Research Technician Position

**Location:** Lake Nona Health Sciences Campus  
**Employer:** Burnett School of Biomedical Sciences. Dr. Muthu Periasamy Lab

As a member of the laboratory team, this candidate will contribute to research focused on studying the role of muscle in energy expenditure and metabolism. The long-term goal of this research is to understand energy balance and obesity. The ideal candidate is highly motivated, energetic, well organized, and is able to work productively both independently and as part of a team.

**Responsibilities**

Primary duties will include:
- Animal colony maintenance and genotyping (PCR)
- Tissue culture
- General laboratory duties
- Participation in ongoing research that involves and modern molecular and biochemical techniques

**Basic Qualifications**
- Hands-on experience with diverse aspects of cellular and/or molecular biology, particularly PCR.
- Experience with animal husbandry and sterile tissue culture, is preferred but not required.
- Well-organized and detail orientated
- Reliable and self-motivated
- Great communication skills

**Required Education**
- A BS degree in Biology
- This is an OPS (non-benefit earning) position, however health insurance is offered
- Equal opportunity employer

To apply, please email a CV/resume along with the contact information for three references to:
