

Chatlos Doctoral Fellowship

The Chatlos Doctoral Fellowship in Biomedical Sciences will be available to the most highly qualified applicants to our PhD program in Biomedical Sciences in the fields of infectious diseases, cancer, cardiovascular diseases or neurodegenerative diseases. Our program admits motivated applicants, who can expect a rigorous training program. To date, our graduates have published numerous peer-reviewed manuscripts in top-tier journals and have been highly competitive in the job market. The prestigious Chatlos Doctoral Fellowship will provide the awardee with a generous 5 year package that will include a financial supplement in addition to the regular stipend, full tuition waiver, and health benefits.

To be considered for the highly competitive Chatlos Doctoral Fellowship in Biomedical Sciences, please include a section in your personal statement describing how your qualifications and academic aspirations would benefit this award.
