**Description:** This elective is designed to provide a comprehensive exposure to inpatient neurology services. The student will be assigned to one of the four services: general ward service, consult service, stroke service, or neuroscience ICU service. The responsibilities will be comparable to those of an intern and this elective provides the experience of being a sub-intern. The student will be responsible for all aspects of inpatient care for a designated number of patients with close supervision by a senior resident or a fellow and the attending staff. The student will also participate in morning report, scheduled conferences and attend grand rounds.

**Objectives:** Provide a comprehensive exposure to various inpatient neurology services.
