Clerkship Director’s Welcome

Welcome to your third year clerkship, “Core Clerkship in Internal Medicine and Family Medicine.” We are very excited and pleased to present to you this exciting and highly challenging clerkship.

As the Clerkship Director and Clerkship Coordinator, We welcome you to the clerkship. We are confident that you will find your experiences in this clerkship to be intellectually and emotionally fulfilling, regardless of where your path in medicine might lead. We invite you to share your experiences and opinions regarding the clerkship itself in an ongoing fashion. Your feedback is essential to continued improvement and development of the clerkship.

This clerkship is a twelve week experience for the third year medical student. It is designed to introduce students to the care of the adult patient with emphasis on diagnosis and treatment of common disorders.

During this clerkship, you will participate fully in the diagnostic assessment, treatment planning and delivery of medical care to adult patients in both the inpatient and outpatient setting. Skills in performing and interpreting the comprehensive medical history and physical examination and providing initial and ongoing plans of care for individual patients will be emphasized. You will learn various diagnostic and treatment modalities, and skills of differential diagnosis and clinical decision-making in the care of individual patients. Evidence-based, humanistic, patient-centered care will be emphasized as well the interdisciplinary care approach.

The clerkship includes several experiences which emphasize longitudinal curricular themes (LCTs) as set forth in the overall curriculum plan. Didactic learning is also included and is linked to weekly system-based themes. Didactic material will be presented in “academic half day” sessions in a modified team learning format.

We realize the amount of material to be learned is formidable. However, it is the goal of all faculty members involved in this course to make the material “more learnable” by teaching by application of knowledge, whether in learning sessions, clerkship projects or patient care. You must prepare in advance (assigned reading) in order to make the most of this approach.

We look forward to working with you and sincerely hope you enjoy the unique and fulfilling experience that is the care of the adult medical patient.

Sincerely,

Sergio Salazar and Kim Gilfedder
“To cure sometimes, to relieve often, to comfort always”

Faculty

Clinical experiences will take place at four different sites. The clinical clerkship faculty will consist primarily of the established and experienced general teaching faculty as well as ancillary providers (nurse practitioners, physician assistants, doctors of pharmacy, etc.) at each clinical location.

General Teaching Faculty

- Sergio A. Salazar, MD
- Maria L. Cannarozzi, MD

Clerkship Overview

During this clerkship, students will participate and demonstrate competence in humanistic and evidence-based inpatient and outpatient care of patients with common medical disorders. Students will also learn appropriate health promotion and health screening for adult patients. Students will learn to work as part of a medical team in all settings and will understand the roles of the interdisciplinary patient care team. Learning activities will include preceptor-supervised clinical experience, clerkship-specific didactics, use of standardized patients and medical simulations, and self-directed learning utilizing information technology. The clerkship has specified the types of patients and clinical conditions students need to encounter, and the physical examination skills and testing and procedural skills that students need to master.

University Course Catalog Description

Students will learn care of the adult patient in both inpatient and outpatient settings, with emphasis on diagnosis and treatment of common medical disorders.

Prerequisites

Successful completion of M2 term

Credit Hours

16 Credit Hours
Clerkship Objectives and Goals

By the end of the clerkship students will be able to:

1. Perform and document a complete history and physical examination of the adult patient in a logical, organized, respectful, and thorough manner

2. Create a differential diagnosis based on the findings from the medical history and physical examination

3. Formulate an initial and ongoing therapeutic plan of care for assigned patients with common medical diagnoses/symptoms:

- Abdominal pain
- Acute infection
- Alcohol/substance abuse/dependence
- Allergies
- Anemia
- Asthma (chronic cough/wheeze)
- Back pain
- Benign prostatic hypertrophy
- Biliary/pancreatic disease
- Cancer(breast/lung/skin/colon/prostate)
- Chest pain
- Cirrhosis/end-stage liver disease
- Congestive heart failure
- COPD/emphysema
- Coronary artery disease
- Delirium/dementia/alterered mental status
- Depression
- Diabetes Mellitus
- DVT/PE/hypercoaguable state
- Dyslipidemia
- Dyspnea/respiratory distress
- Electrolyte or acid/base disorder/dehydration
- Esophageal reflux disease
- Fatigue
- Fever, bacteremia, sepsis
- Gastrointestinal bleed
- Headache
- Hypertension
- Insomnia
- Joint/limb pain/injury
- Nausea/vomiting
- Noncompliance with medication regimen
- Obesity
- Osteoarthritis
- Osteoporosis
- Pain management
- Peripheral vascular disease
- Renal insufficiency/failure
- Sexually transmitted infection
- Skin disorder/problem
- Thyroid disorder
- Tobacco abuse
- Upper respiratory infection
- Urinary incontinence
- Urinary tract infection
- Interpretation: Common serum chemistries, lipid profiles
- Interpretation: Blood culture
- Interpretation: Arterial blood gas
- Interpretation: Electrocardiography
- Interpretation: Chest radiography

4. Demonstrate ability to orally present a new or established inpatient or outpatient case in logical and accepted sequence

5. Document inpatient and outpatient progress notes in a manner that includes appropriate data and reflects clinical decision-making process

6. Discuss basic principles of medical ethics as they specifically relate to care of individual patients

7. Participate (observe, assist or perform) in a discussion about advance directives and informed consent with a patient

8. Perform a computerized literature search to find articles pertinent to a focused clinical question and present information to colleagues
9. Discuss preventive health care issues for adult patients, including rationale and indications for each

10. Discuss the role of team members, consultants and other key personnel in the care of the patient

11. Demonstrate ability to recognize and respond to system flaws in the delivery of care

Required Texts and Materials

IM Essentials: A Medical Knowledge Self-Assessment Program® (MSKAP®) for Students – TEXT. American College of Physicians/Clerkship Directors in Internal Medicine, 2015
ISBN: 978-1-938921-090-4

</table>

Rotations (see individual site description documents for specific information):

- 4 weeks IM ward service at a hospital with a IM Residency (FH South, Orlando Health, Osceola Regional Medical Center)
- 4 weeks IM ward service at a hospital (FH South, Orlando Health, Osceola Regional Medical Center, Flagler Hospital, Heart of Florida, Bay Pines VA)
- 4 weeks ambulatory clinic experience at either community private practice, OHD, CFFHC, Flagler Family Medicine, MDY Primary Care Medicine, Bay Pines Primary Care or FM inpatient/outpatient experience at FH (Winter Park Memorial Hospital or Florida Hospital East Orlando)
Inpatient guidelines:

- Call approximately every fourth night at Heart of Florida, Flagler Hospital, OH, Bay Pines Inpatient and Osceola Regional Medical Center; 3 overnight calls and one weekend day of rounding at FH IM
- Admit at least two patients per call
- Follow no more than five patients at any one time (2-4 is expected)
- No assigned overnight call duties on nights prior to academic half day (AHD)
- Duty hours: maximum 80 hours per work week, no more than 28 consecutive hours on call; minimum one day off in seven averaged over four weeks; at least 10 hours of rest between call and duties the next morning (see Appendix 3)

Academic Half Day sessions (AHD):

- Each Wednesday, weeks 2-11 from 12:30 – 5 PM at the College of Medicine
- All AHD will be video streamed to Bay Pines VA and Flagler Hospital
- TBL format – IRAT/GRAT/Applied Exercises
- Attendance/participation is mandatory; preparation is expected – students must bring iPads or laptops to each session (for quiz purposes)

Other Assignments:

- EBM assignment – generation of clinical question with evidence of research and assessment of evidence application to individual patient
- Reflective writing assignment – written essay describing some experience related to professional behavior (good or bad) in which you are involved

Teaching Modalities

The primary teaching modality throughout this clerkship will be faculty/resident supervised active participation in clinical patient encounters with one on one instruction and feedback. These experiences will occur in both the inpatient and outpatient settings with both internal medicine and family medicine physician preceptors. Resident instructors as well as attending physicians will be supervising students on most medical services when students are rotating through the hospitals with residency programs. When at clinical sites without residents, students will have direct supervision from assigned physician. Students are fully expected to be active participants (not observers) in all aspects of patient care. Teaching rounds on the inpatient service will enable bedside instruction, demonstration, and will emphasize problem solving while encouraging clinical care generated discussion.
Many students are anxious to perform well on the hospital ward service. Students are expected to participate actively in working/teaching rounds daily. Reading each night in the context of patients you have seen is the ideal way to learn new clinical information. Students are an integral part of the hospital ward team and should think of themselves as such. Students should be appropriately assertive in proposing plans of care for their patients. Responsibilities include but are not limited to patient admission history and physical examination, initial differential diagnosis and plan of care, participation in inpatient procedures/diagnostic testing, ongoing patient management and discharge planning/implementation of follow-up care. Care of outpatients in clinic settings should mirror that of inpatients, with self-directed reading and learning, documentation, plan of care, etc.

Students will attend morning report, selected noon conferences and grand rounds with their team. This experience will be overseen and directed by the ward attending physician as well as house staff team members (residents and interns). Students are required to turn in at least three history and physical examinations (H & P) per inpatient rotation to their attending physician and the clerkship coordinator. These should be reviewed and returned to the student with oral/written feedback. Further documentation may be submitted for review at the discretion of the attending physician.

While rotating on each service, students will be evaluated via a clinical performance card (CPC). An example of this card is attached to this document (see Appendix 5). This is a brief assessment of bedside skills and must be completed by an attending physician at each practice site. These assessments are part of each student’s evaluation and must be successfully completed in order to pass the inpatient rotations. Each student must provide four (4) completed clinical performance cards by the end of the clerkship rotation (one for each hospital rotation and two for the ambulatory rotation). It is the responsibility of each student to complete these evaluations by asking an attending physician to complete the card. See Appendix 5 for an example of this card.

All didactic curricular learning is in the context of weekly team-based learning (TBL) academic sessions. Academic half day (AHD) sessions will occur weekly; attendance is required by all students in order to ensure uniform exposure to selected topics. All AHD sessions will be video streamed to the students who will be rotating through Bay Pines VA. These learning sessions will be taught in a team-based learning (TBL) format. As such, advance student preparation is essential to high level learning. Learning objectives and reading assignments for each week are posted on Webcourses clerkship website. Students must bring iPad or laptop to AHD sessions in order to complete IRAT portion of assessment. Other requirements include an evidence-based medicine project completed via generation of a clinical question and follow-up based on your selection of an appropriate patient care issue. A reflective writing assignment will describe an experience related to professional behavior in which you are involved in some way.
KNIGHTS Clinic: During outpatient rotations, some students will be participating in clinical experiences at KNIGHTS Clinic. Full details about this opportunity will be discussed in the IMFM Clerkship Orientation and can be found on the home page of webcourses. The clerkship coordinator is responsible for assignment to KNIGHTS clinic and schedules will be provided to all students assigned.

Geriatric Home Visits: During outpatient rotations, students will be participating in a research project “Bridging the Gap” A Medical Student Home Visit Program that Improves Senior Health and Quality of Life. The clerkship coordinator is responsible for assignments to this project. A Student Handbook will be given to all students assigned.

EBM project description: Each student will choose a specific clinical question based upon ward experiences during the first three weeks of the clerkship. After choosing a question to research, the student will research the medical literature and find 2-4 articles which he/she will read and briefly critique. By the end of week four, the student will submit his/her clinical question in “PICO” format, along with the brief article critiques. Some description of how the medical literature review did or did not affect individual patient care is also expected. Specific forms to document this process are available on Webcourses. Discussing EBM project outcomes i.e. sharing literature review with ward team members is appropriate and expected. Students will present their EBM project in an informal discussion prior to the end of the clerkship. A date for presentation will be scheduled by the clerkship coordinator.

Reflective writing description: The rationale for this assignment is well represented by this excerpt from an article in Academic Medicine: "Reflection…….turns experience into deep learning….allows new experiences to either modify one's existing knowledge structures or schemas or be integrated into one's existing knowledge structures. True behavior change……can occur when one reflects on new experiences and changes their own knowledge structures.”

Due by the midpoint of week ten, this paper should document an experience in which the student was exposed to/observed/demonstrated some element of professionalism (good or bad) in the context of patient care. This could include direct or indirect patient care, observation of good/poor ethics, or any other significant happening which involves professional behavior and makes an impact on the student author.

Webcourses: Grades, assignments and course information is found in Webcourses. Each student is sent an invite when the course is published. Please direct any questions regarding webcourses to the clerkship coordinator.

“The old art cannot possibly be replaced by, but must be absorbed in, the new science”

On-Call Guidelines/Duty Hours

You will follow the call schedule/rotation of your ward team or you will be assigned call by your assigned preceptor. Please take an opportunity at the beginning of the rotation to clarify call responsibilities and expectations with your team, particularly your senior resident and the attending physician. Students are expected to be full participants in the execution of team duties at all times. There is no “unwritten rule” that students should be excused from their responsibilities at a certain hour of the day/night. The exception to this is that all clerkship students are not assigned overnight call duties on nights prior to AHD Wednesdays.

Please be aware that call duties and frequency vary from one hospital site to another. While this may be deemed “not fair” by some, this is simply a reflection of life in hospital medicine. Every effort has been and will continue to be made to even out call responsibilities among students. Please do not worry about what other students call responsibilities are, but focus your attention on your assigned hospital schedule.
You should admit at least two new patients per call day while on the internal medicine inpatient service. You should not follow more than five patients at any given time.

Duty hours should not exceed 80 hours per week, including in-house call. You should receive one day off in seven, averaged over a four week period. If you feel that you are working more than 80 hours per week or not receiving appropriate time off, please contact the Clerkship Director immediately.

On weekends and holidays, standard responsibilities when you are NOT on long call include daily rounds and charting progress notes. Resident and attending physicians are neither expected nor encouraged to give students an entire weekend off. Holidays will be handled according to college-wide policy. If on long call during a weekend day or single day holiday (such as Memorial Day, July 4th, Veterans Day, etc), students are responsible for being readily available for the entire 24 hour period, if necessary. For more details regarding duty hours guidelines, please reference Appendix 3.

**Clinical Locations**

For site descriptions, directions and/or maps to the various clinical sites, please access the “Site Locations” folder/tab of the electronic curriculum management system.

**Logbook and Required Clinical Encounters**

Over the course of the clerkship, students are required to encounter at least one patient with each of the clinical diagnoses listed in Appendix 1. These patient encounters must be logged by the student in a timely manner via UCF electronic logbook provided. Logbook entries will be monitored regularly by the Clerkship Director. If a student does not have the opportunity to encounter a patient with a specific required diagnosis, the Clerkship Director will provide an alternate experience (on-line or simulated case) for that student.

The primary tool for entering, maintaining, and tracking accurate records is the electronic patient log system, OASIS. You have been provided with a pocket list of required clerkship diagnoses; it is recommended that you carry this list with you at all times in order to facilitate meeting this requirement.

In order for the Clerkship Director to monitor and facilitate your clinical experience, it will be necessary for you to keep your logbooks up to date. At a minimum, students should update the logbooks once weekly. This should be completed by Sunday of each week, as logbook entry reports will be generated for review each Monday morning. If this is not completed, your final clerkship grade will be affected. Logbook entries will be monitored by Clerkship Director or staff on a weekly basis. The expectation is that students will complete 100% of the minimum
requirements as presented in the log. If exposure to a required clinical cases has not been met at predetermined points during the clerkship, additional clinical encounters or supplemental learning experiences will be arranged to accommodate student learning needs. Logbook compliance is an issue of student professionalism. Repeated non-compliance will be addressed by the SEPC. Students who fail to maintain timely, complete, and accurate records of their patient encounters may require partial or complete remediation of the clerkship.

Note that you will have four separate types of encounters to enter into your logbook during this clerkship. They are as follows:

1. Hospital patients whom you admit, transfer, care for in a cross-coverage mode, or on whom you observe/assist/perform medical procedures
2. Clinic patients whom you evaluate in OCHD, Bay Pines outpatient clinics, CFFHC, private clinics, FM general medicine clinic or FM specialty clinics
3. Procedures – Procedures in which you observe/assist/participate
4. Simulated patient cases (if applicable or assigned to you by Clerkship Director)

**Expectations for Clerkship Participants**

**Students:** expectations of all students include the following:

- Be an active learner - present and participate fully in all clerkship activities, including orientation, group meetings, and examinations.
- Make decisions, defend them, and understand the consequences of both a good and a poor decision.
- Give 100% effort while on the clerkship and expect the same from your colleagues.
- Be current with all your patients and be prepared in advance with relevant reading. Search peer-reviewed literature and bring articles with you. (A tool for success: read first → see patient → read again → present patient)
- Be present every day unless you are ill or have a family emergency.
- Be respectful of your classmates, residents, faculty, and other staff at all times.
- Expect and ask for residents and attending physicians to provide constructive feedback regarding your performance. Formal mid-rotation feedback sessions will also be held with the clerkship/site director. Do not feel you are imposing by asking for feedback. Be aware of barriers to eliciting feedback. These include:
  1. Confusing feedback with evaluation
  2. Feeling the need to be right or perfect
  3. Feeling that you are imposing by asking for feedback
  4. Allowing the person who gives you feedback to be vague. Don’t accept “good job” or “fine” as feedback. If you did well, ask for the specific behaviors that were good/exemplary, etc.
- Remember that the patient is the focus of clinical care, not you
- Take advantage of the unique aspects of each rotation and enjoy the experience
Attending physicians and residents: All attending physicians and residents are expected to provide:

- Daily supervision
- Direct observation of basic skills
- Teaching and guidance
- Constructive feedback
- Written assessment of student performance on the rotation within six weeks of completion of the rotation

Site Directors: All Site Directors are expected to:

- Work directly with the Clerkship Director to develop and implement the clerkship
- Serve as a person of first contact for students who have site-specific questions
- Participate in curriculum design
- Participate in the clerkship grading committee.

Clerkship Director: The duties of Clerkship Director have been defined by UCF COM. At a minimum, Clerkship Directors are expected to provide:

- Student orientation to clerkship
- Clerkship and session level objectives and grading criteria
- Resources for consistent didactic and learning experiences
- Orientation of community preceptors and residents to clerkship content, policies, and procedures
- Overall course management and leadership
- Necessary disciplinary action regarding students
- Both mid-clerkship formative feedback (verbal and written) as well as final summative assessment within six weeks of clerkship completion

Grading and Evaluation Policies

Students must successfully complete each component of the clerkship in order to receive a passing grade for the clerkship rotation. If a student is found to be deficient in any one component of the clerkship, he or she may receive a grade of “remediate,” “incomplete” or “failure” and be required to remediate.

Students will successfully pass this clerkship upon successful completion of the following:

1. Completion of twelve weeks of clinical duties, including all required rotations
2. Excused absences of no more than three days in twelve weeks with no unexcused absences (exceptions to be managed by Clerkship Director)

3. Completion of patient log (diagnoses, procedures, experiences) in ongoing and timely fashion

4. Satisfactory clinical preceptor evaluations from all supervising attending and resident physicians (includes timely completion/submission of required history and physical documentation (at least three submissions during each rotation))

5. Satisfactory and timely completion of required assignments: EBM project and reflection paper

6. Timely return of clerkship materials, including loaned textbooks

7. Successful completion of clinical skills written examination

8. Successful completion of clinical performance examination (OSCE)

9. Successful completion of NBME Internal Medicine Subject “Shelf” examination with a score at or above the national 5th percentile

10. Achievement of composite numeric clerkship grade of 70.0 % or higher

Each student will be reviewed by the Clerkship Committee meeting before final grade is assigned. Students will also receive formative feedback from Clerkship Director at mid-point of rotation and may be reviewed at any time if interim concerns are raised regarding student performance or well-being. Performance is assessed in each of six ACGME competency realms: patient care, medical knowledge, professionalism, communication, systems based practice, and practice based learning and improvement.

Sources of information include, but are not limited to, scheduled formal evaluations by supervising attending and resident physicians, Associate Clerkship Directors or Site Directors, and the Clerkship Director, along with spontaneous or requested verbal or written feedback from multiple sources (e.g. faculty, residents, other students, nurses, other staff, patients, and student self-evaluations). If the Clerkship leadership finds reason to believe the student has performed substantially below expectation in any of the aforementioned areas, the Committee will decide the student should not pass the Clerkship, even with a composite numeric score of 70 % or higher.
Assessment of Student Performance

I. Clinical Preceptor Evaluations 45 %
Inclusive of:
- evaluation of clinical performance
- successful completion of at least two history and physical documents per rotation (more if requested by supervising attending physician)
- completed clinical performance cards (one for each 4 week rotation)

II. Other Evaluations and Assignments 55 %
Inclusive of:
- NBME Shelf Examination (Internal Medicine)** 20 %
- Weekly Formative Quizzes (IRAT) 10 %
- Weekly Formative Quizzes (GRAT) 5 %
- Clinical Performance Exam (OSCE) 8 %
- Clinical Skills Exam 7 %
- Professionalism/Peer Evaluation 5 %
- Evidence-based Medicine Project P/F
- Reflection Paper P/F

**Note minimum criteria for grade of “A” include the following:
NBME subject examination in internal medicine must be passed at or above the 70th percentile in order to be eligible to receive a grade of “A” in the clerkship.
Midterm and End of Clerkship Evaluation

Each student will meet with the Clerkship Director or Site Director halfway through the clerkship to review and discuss clinical experiences and performance to date, review logbook entries and discuss any concerns of Clerkship Director, Site Director or student.

At the end of each service rotation (weeks 4, 8, and 12), summative written evaluation(s) will be completed by supervising attending and resident physicians. Students are encouraged to seek oral feedback from their supervising physicians at the midpoint of each rotation and more frequently, as appropriate.

Preceptor evaluations will be documented via approved COM evaluation forms. All faculty have been made aware of required summative evaluations which are to be performed. Please note that the mid-term and final clerkship evaluation forms are available on OASIS for your review and use as needed. Final summative evaluation forms will be completed electronically by preceptors and will be notified of this by the Clerkship Coordinator.

No formal end of clerkship evaluation meeting is scheduled. Students are welcome to make appointments to review performance (including review of preceptor evaluations) at any time.

Unsuccessful Clerkship

- A score of less than the 5th percentile on an NBME shelf examination
- A failing overall cumulative performance
- Unprofessional behavior, including failure to maintain timely and accurate patient logbook data.
- Failure to complete any component of the clerkship

Clerkship Remediation

- Any student scoring less than the 5th percentile on an NBME shelf examination will be given the opportunity to retake the test and must score at the 5th percentile or above to pass. Two failures on the shelf examination will typically result in a failing grade in the course and require remediation of the entire clerkship
- Remediation for students who fail the departmental exam or any other component is at the discretion of the Clerkship Director
- Remediation for students exhibiting unprofessional behavior is at the discretion of the Clerkship Director

Please refer to the UCF COM Student Handbook http://med.ucf.edu/students/affairs/documents/student_handbook_2010.pdf) Section V. subsection B. Medical Student Advancement and Faculty Evaluation for details on remediation and appeal of clerkship assessment.
Course Evaluation

We value your input! In order for clerkship administration to improve this clerkship we need your comments about the strengths and weaknesses of the experience. All clerkship administrators are available to discuss issues at any time. You do not need to wait until you complete the clerkship evaluation to offer suggestions.

Students are required to complete a clerkship evaluation form and appropriate faculty/resident evaluation forms as appropriate. These evaluations will be completed in OASIS. Grades will not be released until these evaluations are completed.

Professionalism

Professionalism is highly stressed within this clerkship. You are expected to hold yourself and your colleagues to the highest professional standards at all times. Your professionalism will be assessed in an ongoing manner during this clerkship by your patients, your attending physicians and residents, your colleagues and ultimately by yourself. Breaches in medical professionalism will be dealt with on an individual basis and are subject to significant consequences. If you note any particularly good or bad examples of professionalism on the part of your colleagues you are encouraged to report these either anonymously or in person to the Clerkship Director, Site Director(s) and/or Clerkship Coordinator.

“If I take care of my character, my reputation will take care of itself”

-D.L. Moody

The following are guidelines that all students are expected to follow throughout this clerkship. You will find that they are also important in other clerkships as well and throughout your training.

1. **Punctuality is key.** Students are expected to be on time to work. Tardiness will not be favorably looked upon. Be aware of how long it will take you to get where you are expected. If you are going to be late, call those expecting you in advance.

2. **Dress for the job.** As per the UCF COM Dress Code Policy (see Appendix 4), medical students are expected to maintain a proper professional image in their behavior and personal appearance at all times. Please reference the dress code policy if in doubt. Ask for guidance from others if necessary.
3. **Know when and where you need to be.** Frequently review your schedule and syllabus, to verify when and where you need to be present. This will not only allow you to be on time, but will also prevent you from wasting your own time if you are not expected.

4. **Emergencies/Illnesses do occur.** Your preceptors recognize that situations arise which require students to miss time from their course/clinical responsibilities. When an absence is necessary the student must telephone his/her preceptor, resident or other appropriate team member, Clerkship Director and/or Clerkship Coordinator early on the first day of absence. He/she should indicate the nature of the absence. E-mail is an acceptable alternative if notification is early in the day, late at night, or if administrator(s) not available by telephone. It will be prerogative of the Clerkship Director, following consultation with the student to excuse the absence. In situations where the student knows he/she will be absent from any responsibilities for other than medical reasons, the student is required to ask the Clerkship Director’s permission in writing at the earliest possible time, preferably several week in advance of the expected date of absence. Absences may need to be made up in during scheduled breaks at the discretion of the Clerkship Director. For complete information regarding COM policies related to clerkship absence, please see Appendix 2.

5. **Be professional.** Remember you will need to earn the respect and trust of your patients. As student physicians, you will be expected to behave politely and professionally. Be courteous to the needs of patients and respect their privacy. Be careful not to discuss patient cases in public settings as their illness and history are confidential. In addition, drape patients appropriately during exams and request a chaperone when necessary.

6. **Remember** to sign all notes legibly.

7. **Be prepared.** This means keeping up with reading assignments and being ready to discuss topics on rounds and during conferences.

8. **Be careful.** Remember that as a student, you should not act independently or without the knowledge of those legally responsible for the care of the patient. If you are uncertain whether or not you need a chaperone or are uncomfortable with exam findings, let your preceptor know immediately.

> “Integrity always, Service before self, Excellence in all we do”

> -Creed of Servicepersons, United States Air Force
How to Be a Successful Clinical Clerk

The following tips are summarized from the “Primer to the Internal Medicine Clerkship” located on the Clerkship Directors in Internal Medicine (CDIM) website. These tips will be useful in any of the clerkship disciplines through which you rotate.

1. Find out what your preceptors expect of you. Meet and try to exceed their expectations.

   Be fully prepared and on time for work rounds. Have a daily plan for your patients’ care. Initiate contact with consultants as appropriate. Participate in or observe as many procedures as possible, even if you are not following the involved patient. Learn about the other patients on your team, at least to gain a basic understanding of what is going on with each of them. Help out team members when needed, however not to a degree which interferes with your self-directed learning.

2. Go the extra mile for your patients. You will benefit as much as they will.

   Communicate effectively with your patients, spending time to learn about who they are. Discuss diagnostic and therapeutic plans with patients and their families. Feel free to have emotional discussions with patients when appropriate. You may be able to provide substantial information and support.

   “The treatment of disease may be entirely impersonal; the care of a patient must be completely personal”

   -Francis Peabody, 1927

3. Go the extra mile for your team. Additional learning will follow.

   Being a “team player” is important – being available is also key to learning and seeing procedures or newly admitted patients. You may not always recognize it, but you are an integral part of the inpatient care team. Knowing your role is important – generally being flexible and “going with the flow” is best, however if you have an important question or concern, it is important to make this known. Often times, your observations will serve as valuable contributions to patient care.

4. Organization is crucial to success without stress.

   Keep a calendar and mark all conferences/call days right away. Develop a system for maintaining patient data and noting trends in laboratory results (i.e. hemoglobin trending down or creatinine trending upward). Be able to have
pertinent information (vital signs, laboratory or test results) easily available on rounds.

5. Read consistently and deeply. Demonstrate that you are a self-directed learner as you raise what you learn in your discussions with your team and in your notes.

   A goal should be to integrate your basic science knowledge to your patient. Clinical clerkships are unlike any learning experience you have had to date. You are, to a large extent, responsible for your own learning. This learning should be based upon your patient encounters. You should attempt to develop an organized reading plan from the first day of the clerkship. Your reading plan should incorporate assigned reading for AHD sessions with reading focused on topics encountered during your clinical day, either with patient encounters, didactics or evidence based questions. A final type of reading should be a readily available resource to carry with you and read when time allows during the course of patient care. The Pocket Medicine text is excellent for this third type of reading.

6. Follow through on every assigned task.

7. Ask good questions.

8. Educate your team members about what you learn whenever possible.

   Strive to practice evidence-based medicine. Use evidence-based guidelines whenever possible and learn from them. It is our responsibility to bring the best scientific evidence to every clinical decision that we make.

9. Speak up – share your thoughts in teaching sessions, share your opinions about your patients’ care, constructively discuss observations about how to improve the education you are receiving and the systems around you.

10. Actively reflect on your experiences.

   Solicit feedback early and often. Acting on such feedback demonstrates that you care about your performance in the hospital.

   “Nobody cares how much you know until they know how much you care”

   -Jocelyn Elders, M.D.

11. The more you put in, the more you will gain
12. Pay attention at all times, even when the focus is not on you or your patient. Learning moments may come when you least expect them.

“You can observe a lot just by watching”

-Yogi Berra

13. Be caring and conscientious and strive to deliver outstanding quality to your patients as you learn as much as you can from every experience.

“One of the essential qualities of the clinician is interest in humanity, for the secret of the care of the patient is in caring for the patient”

-Francis Peabody, 1927

14. Get help if you feel overwhelmed.

Any student having academic or personal problems during the rotation is encouraged to contact the Clerkship Director as soon as possible. In this way, we can provide you appropriate counseling during the rotation. If there are academic concerns regarding your rotation, we can make the appropriate suggestions. Alternatively, if there are other problems we can place you in contact with the appropriate services available to our medical students.

**Bloodborne Pathogen and Communicable Disease Exposures**

In the case of a student exposure to a bloodborne pathogen through needle stick should occur, the student on the pediatric clerkship can refer to Appendix J for the Orlando Health Policy on Needle Stick Exposure. Students are also encouraged to reference the UCF COM Student Handbook:
(http://www.med.ucf.edu/students/affairs/documents/infectious_diseases_and_environmental_hazards.pdf)

**Standard Precautions**

Refer to the UCF COM Student Handbook
(http://med.ucf.edu/students/affairs/documents/student_handbook_2010.pdf) Section VII. Health Policy E. Exposure to Infectious Disease and Environmental Hazards.
HIPAA and Patient Confidentiality

All HIPAA and Patient Confidentiality agreements should be completed through the office of Student Affairs at the UCF College of Medicine prior to beginning of clerkship.

Disclaimer: The Clerkship Directors(s) reserve the right to modify the content and/or the grading policy of the class if necessary, to ensure the academic integrity of the clerkship.

Appendix 2 –
University of Central Florida College of Medicine
Policy on 3rd and 4th Year Attendance

General Attendance Policy
As a member of a health care team during the third and fourth years of medical school, students are expected to attend all scheduled hours of clinical responsibilities and didactic instruction. There is no guaranteed time off for holidays. Students are expected to follow the holiday practice of the clinic/hospital/site at which they are rotating. Clinical responsibilities such as night call and rounding take precedence over holiday schedules. If situations arise which require students to miss time from clerkship responsibilities, the guidelines below will be followed.

Excused Absences: Definitions and Required Actions:

Anticipated Absences:
- **Presentation of research at professional meeting**
  - Maximum of one meeting per academic year; and
  - Same research project may not be presented at more than one meeting; and
  - Time away is only for presentation of data and travel time; and
  - Requests must be submitted to Clerkship Directors for approval no later than 6 weeks prior to date of presentation.
  - If approved, the student is responsible for notifying the attending/resident and their team in advance of all anticipated absences.
  - The student must complete the absence form, have it signed by the Clerkship Director and forward it to the Office of Student Affairs.
  - Requests for exceptions to this policy (e.g., for those on National Committees or those with compelling reasons to give additional research presentations) must be discussed with the Clerkship Director in advance.
- **Residency interviews**
  - During interview months of October-January, students will be allowed to take time off for interviews.
  - On 4-week rotations, the maximum number of days allowed is 4 (no more than 3 consecutive days). On 2-week rotations, the maximum is 2 days. Requests for additional days must be discussed and approved by the rotation director. If request exceeds the maximum number allowable, student may be required to repeat the rotation.
  - Requests must be submitted in writing to Clerkship Director/s prior to the start of the affected rotation/s or within 24 hours of an interview offer during the course of the rotation.
  - Once approved, the student is responsible for notifying the attending/resident and their team in advance of all anticipated absences.
  - The student must complete the absence form, have it signed by the Clerkship Director and forward it to the Office of Student Affairs.
- **Meeting with core advisor or Dean of Students**
  - May schedule one meeting with advisor or Dean of Students during each clerkship/elective
  - Meeting/s must be approved in advance by the Clerkship Director; and
• Meeting/s must be scheduled at a time that minimizes disruption of clinical responsibilities, didactics and other clerkship activities; and
• Absence includes time for meeting and appropriate travel time only; and
• Students are required to be present at clinical sites before and after meeting/s as dictated by their clinical schedules.

Unanticipated Absences:
  o Hospitalization of student
  o Death of family member
  o Illness
    • An excused absence may be granted if you are ill.
    • These absence require that a note from your physician be obtained and given to the Clerkship Coordinator within 24 hours if: illness lasts 72 hours or more at any time, lasts 24 hours during the final week of a rotation, or at the discretion of the Clerkship Director; and
    • The Clerkship Coordinator and the attending physician/resident physician on your clinical team are notified by you in a timely fashion (e.g., before the start of AM rounds); and
    • The student absence form is completed, signed by the Clerkship Director and forwarded to Student Affairs.

Unexcused Absences: Definitions and Required Actions:
  o Unexcused Absences include:
    • Vacations, personal days or social events, including weddings, graduations or birthdays
    • Routine doctor/dental appointments
    • Taking Step 2 exams during the third year
    • If the student chooses to travel for personal reasons during the rotation (e.g., a weekend off), it is expected that the student will return to her/his clinical responsibilities on time. Delays in returning (e.g., bad weather, missed flights) will be considered as unexcused.
    • Missing any portion of the Orientation to the Third Year, the M3 Capstone, the M4 Capstone or the Longitudinal Curricular Sessions
  o In the event of an absence from the clerkship without permission from the Clerkship Director, the student will lose 5 points for each unexcused day. These points will be taken off the final clerkship grade.
  o Additional remediation may be required at the Clerkship Director’s discretion (e.g., the taking of extra call).

Failure to comply with any component of the above instructions will result in unexcused absence and loss of 5 points from the final clerkship grade for each day missed.

Residents or faculty directly working with students cannot grant approval for absence.
Please do not approach these individuals, as approval by them is not official.
University of Central Florida
College of Medicine

3rd and 4th Year Attendance Agreement

Student: _______________________________ Class of: _____________________

I have read and understand the policy on 3rd and 4th Year Attendance. I understand that absence from the clerkship may require me to make up time, which could include additional call or a weekend shift. I also understand that failure to adhere to the Attendance Policy may affect my final grade.

Medical Student Signature: ____________________________ Date: ______________

Clerkship Director Signature: ____________________________ Date: ______________
Appendix 3 - Policy on Clerkship Duty Hours

The University of Central Florida College of Medicine will follow the duty hour guidelines set by the Accreditation Council for Graduate Medical Education (ACGME), ACGME 2011.

1. Duty hours are defined as all clinical and academic activities related to the education of the medical student i.e., patient care (both inpatient and outpatient), administrative duties relative to patient care, the provision for transfer of patient care, time spent in-house during call activities, and scheduled activities, such as didactic sessions, grand rounds and conferences. Duty hours do not include reading and preparation time spent away from the duty site.
   a. Duty hours must be limited to 80 hours per week, averaged over a four-week period, inclusive of all in-house call activities.
   b. ON AVERAGE over the duration of the clerkship adequate time for rest and personal activities will be provided and will consist of a 10-hour time period between all daily duty periods and after in-house call.
   c. In-house call must occur no more frequently than every third night.
   d. Continuous on-site duty, including in-house call, must not exceed 24 consecutive hours. Students may be on site for up to 4 additional hours in order to participate in didactic activities.
   e. Students must be provided with one day (24 consecutive hours) in seven, free from all educational and clinical responsibilities, averaged over a four-week period.

2. This policy will be published on the College of Medicine website, in the clerkship handbooks, and in the faculty and preceptor handbooks. This information will also be covered in the COM Clerkship Orientation.

Oversight of this policy will be the responsibility of the Clerkship Director and the relevant Clerkship Site Director/s. Students are responsible for tracking and logging their duty hours in OASIS. Faculty and students with concerns regarding possible duty hour violations should report those concerns directly to the Clerkship Director in a timely fashion. Failure to keep duty hour log up to date in OASIS may result in participation point penalization from final grade.
Clerkship Duty Hour Agreement

I have read and understand the above clerkship duty hour policy and agree to follow this policy and report to the Clerkship Director any concerns I have regarding possible violations of this policy.

- My duty hours will be limited to 80 hours per week, averaged over a four-week period. This includes all in-house call activities.
- Adequate time for rest and personal activities will be provided and will consist of a 10-hour time period between all daily duty periods and after in-house call.
- I will have one full day in seven free of educational and clinical responsibilities, averaged over a four-week period.
- In-house call (this does not include participation in a night float schedule) will occur no more frequently than every third night, averaged over a four-week period.
- I will track and log my duty hours in OASIS every week. I will report to the Clerkship Director any excess duty hour circumstances that might occur causing me to be in substantial violation of the ACGME regulations; it will be expected that the Clerkship Director will take the necessary corrective action to prevent such substantial violations from occurring repetitively.

Appendix 4 - Dress Code for Patient Care and Clinical Activities

Students must maintain an appearance that conveys a professional image and is suitable for duties in all patient care areas including patient encounters in the ambulatory setting and hospital wards. Acceptable requirements for appearance include the following:

a) Photo identification badge must be worn at all times when engaged in College of Medicine sanctioned activities off campus, as appropriate.
b) White lab coats should be clean, wrinkle free and in good repair.
c) Professional clothing: Pressed slacks or skirt as appropriate for gender. Neat, clean shirt or top.
   a. Men should wear dress shirts or polo shirts with collar. Ties are optional but are recommended for patient care.
   b. For women, low cut, midriff, strapless or see-through blouses, shirts or dresses are not acceptable. Undergarments should not be visible.
   c. T-shirts with slogans or pictures are not allowed.
   d. Jeans, shorts, miniskirts and athletic shoes are not considered professional clothing.
   e. Shoes should be clean with heels no greater than 2 inches.
   f. Scrubs should only be worn as appropriate at the discretion of the team.
d) Jewelry selection: Two earrings per ear maximum may be worn and must be appropriate for patient care areas. Other than earrings, no visible piercings are allowed. Bangle bracelets are not recommended.
e) Makeup should project a professional image.
f) Hair must be clean and styled in such a manner as to prevent inadvertent contamination during patient care and other professional duties. Unusual and unprofessional hair styles or color are not allowed. Long hair should be controlled in the back and unable to fall forward during activities. Facial hair must be neatly groomed or clean-shaven.
g) Headgear that is not worn for religious purposes is not allowed.
h) Fingernails should be clean and maintained at a reasonable length of ¼” or less. Acrylic nails are not allowed.
i) Body art/tattoos should not be visible.
j) For patient comfort purposes excessive perfumes, colognes, aftershaves, scented lotions etc. should not be worn in patient care settings.
k) Gum chewing or use of any tobacco products is not allowed in clinical settings.
l) Socks must be worn by men and when appropriate for women.
