

Hurricane Irma Update, 9/7/17:

In the event that the hurricane has significant impact on Central Florida, the GME programs follow the approved UCF COM GME Disaster policy and the information below. Also residents should follow the local hospital and clinic schedules instead of any UCF announcements about closings. Conditions may vary by locale (Orlando versus Gainesville).

Each Program Director will work with their local hospitals/facilities and Chief Medical Officer to use discretion about who is to report to work, who is essential and who is nonessential.

Though UCF COM will be closed Friday September 8 through Monday, September 11, the GME office will monitor emails and respond asap to any urgent matters.

All residents should ensure their PD and program coordinator has their email and cell phone number for any emergency or storm-related communication.
