INTRODUCTION

The University of Central Florida, College of Medicine promotion and tenure criteria set forth the principles for faculty appointment, promotion, and the award of tenure. These criteria and guidelines expand the University of Central Florida's regulations on promotion and tenure pertaining to the College of Medicine. The document addresses specific criteria for faculty in the Departments of Medical Education, Internal Medicine, Clinical Sciences and in the Burnett School of Biomedical Sciences. Each unit has established criteria for faculty who are in a tenure track position and aspire to be awarded tenure and/or be considered for promotion. Each unit also has developed criteria for promotion of non-tenure track faculty. Separate criteria have also been developed by the Burnett School of Biomedical Sciences for those non-tenure track faculty who function as part of a scientific team of scientists working with a PI.

COLLEGE OF MEDICINE GENERAL REQUIREMENTS

Scholarship and Scholarly Activity

The academic mission of the College of Medicine requires all faculty members to engage in scholarship and scholarly activity. Faculty efforts in these areas are reported and assessed during the annual evaluation process and are considered pivotal when a faculty member is considered for promotion.

Scholarship, marked by the methodical accumulation and acquisition of knowledge leads to expert mastery in one or more areas of academic study. The generation and dissemination of new knowledge demonstrates proficiency in a field of study and sets the pace for future generations of professionals and researchers. Scholarship is demonstrated by scientific investigation and publication, and is often accompanied by funded research.

Scholarly activity draws from the current literature and, when appropriate, "best practices" in one's field-to create new knowledge.

Scholarship and scholarly activity requires the dissemination and acceptance of new knowledge by one's peers. Evidence of this can include creative works in teaching, research, academic leadership, clinical expertise, and/or other activities in which the College of Medicine faculty might be engaged. In all cases, the faculty member assumes primary responsibility for dissemination of new knowledge and submission for peer review.

Promotion Profile

Faculty members in the College of Medicine engage in a range of activities, which may include teaching, research, clinical expertise, academic leadership, service, and/or other activities. Such activities support the academic mission of the college and thereby allow the promotion profile to reflect the unique combination of activities and accomplishments of each faculty member and may vary substantially from one faculty member to another. Moreover, the efforts of some faculty members may be concentrated largely in a single area such as teaching or research (thereby establishing a specialized area of concentration for that person), whereas the efforts of other faculty members may be distributed over two or more areas of concentration.

Aspects to the evaluation of faculty members for promotion in the College of Medicine include: (1) evidence of scholarship in research, e.g., peer-reviewed publications, experimental research, clinical trials, population studies, scientific grants, scientific reviews, membership on editorial boards, service on national committees or in scientific societies, (2) evidence of scholarship in teaching, e.g., peer-reviewed publications, classroom teaching, curriculum design, textbook authorship, mentorship, teaching awards, invitations to speak at national conferences, and (3), when appropriate (for clinical faculty), evidence of excellence in clinical practice, e.g., innovative clinical treatment, effective clinical outcomes, evidence of patient safety and quality improvement. To facilitate evaluation of a faculty member's activities in all of the areas in which he/she may support the college's academic mission, the college has identified for each of these areas examples of accomplishments that represent evidence of excellence in scholarly activity and scholarship (Appendix I).

General Qualifications for Promotion to the Rank of Associate Professor

Candidates must have a terminal degree and postdoctoral experience and/or training. Clinician faculty candidates must also have board certification. The usual time in rank as Assistant Professor is five years.

Therefore, requests for promotion to Associate Professor normally will not be considered until a full five years in the Assistant Professor rank has been served. Early consideration for promotion to Associate Professor is appropriate when all of the criteria that would have been evaluated after a five-year interval are clearly fulfilled in fewer than five years. Years in the equivalent rank at one or more other institutions prior to beginning employment at UCF may be counted when calculating the total number of years in rank. All candidates for promotion to Associate Professor must demonstrate a sustained record of productive scholarship and scholarly activity demonstrating regional or national prominence, e.g., peer-reviewed publications, invitations to present at regional or national meetings, service on editorial boards.

General Qualifications for Promotion to the Rank of Professor

The title of Professor represents the highest academic award within the institution and holds special recognition in the College and academic community. Not all Associate Professors will reach the rank of Professor. Promotion to Professor is not awarded based on longevity, but rather because of superior achievement at the national or international level with the promise of continued contribution. The usual minimum time in rank as Associate Professor is five years. There is no limit to the maximum years for consideration. Early consideration for promotion to Professor is appropriate when all of the criteria that would have been evaluated after a five-year interval are all clearly fulfilled in fewer than five years. Years served in the equivalent rank at one or more institutions prior to beginning employment at UCF may be counted when calculating the number of years in rank. However, there is no maximum number; more than five years might be required to establish acceptable credentials. All candidates for promotion to Professor must demonstrate a sustained record of productive scholarly activity and scholarship, e.g., grants and peer-reviewed publications, demonstrating national or international prominence.

NON-TENURE-TRACK FACULTY DEPARTMENT OF CLINICAL SCIENCES

General Considerations

Non-tenure-track faculty members in the Department of Clinical Sciences typically divide their time among the following areas: clinical practice, medical student teaching, and research. They may participate in scholarly activity in any or all of these domains. To qualify for promotion to a higher rank, all non-tenure-track faculty members in the department must both demonstrate excellence in their primary area of concentration and competence in the other areas in which they have responsibilities. In addition, they should be able to show evidence of sustained productivity in scholarship pertaining to their primary area(s) of concentration. Some faculty members in the department in addition to clinical, teaching and research activities, play a significant role in educational leadership (e.g., as module directors or year directors), in which case evidence of excellence in this area is also required for promotion to a higher rank.

Finally, all faculty members in the department participate in service activities. Service activities typically represent a relatively small proportion of any faculty member's assignment; yet, significant contributions in this area should also be recognized when considering a faculty member's qualifications for promotion.

The College of Medicine has identified examples of evidence (Appendix I) that may be used to demonstrate excellence in clinical activities, teaching, scholarship, leadership, and other activities when a faculty member is considered for promotion to a higher rank. These lists of examples are intended to cover the wide range of activities and products that might be associated with a diverse group of faculty. Therefore, a faculty member is not expected to demonstrate every example of evidence listed. The actual mix of examples included as evidence of excellence and achievement in a promotion portfolio may vary widely from one individual to another.

Founding Faculty effort with Curriculum Development, Achievement of Full Accreditation and Developing Pegasus Health

Faculty hired by the College between 2007 and 2013 are designated Founding Faculty. Specific activities of these individuals that differ from other university faculty are outlined in Appendix II. The founding faculty, in varying degrees, has devoted their efforts to developing the educational program for the MD degree at the expense of having protected time to produce individual scholarly works. The highly integrative MD educational program necessitated that the efforts of these faculty were directed to having module or clerkship meetings to develop and integrate the content of these courses. Accreditation standards required the development of integrated formative and summative assessment questions related to overall goals and objectives that required faculty to develop questions in group meetings much like processes of the National Board of Medical Examiners. The LCME has twice commended the college for the internally developed system that evaluates module/clerkship performance as well as that of individual faculty. This process of continual quality improvement has been exercised since day one and the result is a dynamic and highly integrated educational program developed and approved by faculty and recognized by the LCME.

National data is available on the performance of the students within the program attesting to the excellence faculty have exhibited in their founding efforts in these initial years. Evaluation of the faculty and the assessment of the particular module/clerkship are paramount and should be outstanding for this recognition in the promotion qualifications. In addition, evidence will need to be provided concerning the continued productivity of the respective faculty.

Some physicians were hired with the responsibility of developing the Pegasus Health Practice. Like those faculty who developed the educational program, these individuals have devoted their efforts in making the practice functional. Specific activities in this regard are also found in Appendix II. Quality improvement measures and evidence based medicine practice will be used for their evaluation and assessment of effectiveness.

Founding faculty who demonstrate significant involvement in the examples of founding activities which are found in Appendix II may use these activities as evidence of one component of accomplishment for one step in the promotion process either from Assistant to Associate or from Associate to full Professor. It is expected that the founding faculty will also be involved in other activities demonstrating scholarship.

Criteria for Promotion to Non-tenure Track Associate Professor

For promotion to Associate Professor, a candidate must demonstrate: (1) excellence in at least one area of concentration (teaching, clinical or research, and competence in the others, (2) a sustained and productive record of peer-reviewed scholarship in his/her area(s) concentration and, (3) substantial service contributions. Examples of lines of evidence that may be used to demonstrate achievement of these criteria are listed in Appendix I. Moreover, for promotion to Associate Professor, the candidate must have established a strong regional or national reputation for scholarship in his/her area(s) of concentration.

Acceptance of educational or other materials in peer-reviewed repositories, acceptance of articles for publication in refereed journals, invitations to speak at regional or national meetings, service as an ad hoc reviewer or on editorial boards, service on regional or national committees or review panels and other lines of evidence can indicate that a candidate has established a strong regional or national reputation for scholarship.

Clinical Practice and Clinical Leadership

Excellence in clinical practice is an important component for promotion to non-tenure track Associate Professor in Clinical Sciences. Examples of achievement in this area include but are not limited to founding faculty activities in the establishment of the College's clinical practice, documented practice of evidence-based medicine, excellent clinical outcomes, high patient satisfaction, establishment of a regional or national referral base, effective participation in clinical quality and safety initiatives and regional or national recognition as a clinical authority.

Teaching and Educational Leadership

Excellence in teaching is an important component for promotion to non-tenure Associate Professor in Clinical Sciences. Examples of this achievement include but are not limited to leading or participating in didactic courses; mentorship of medical students, graduate students and/or postdoctoral fellows; development of novel materials; and teaching in diverse components of the MD program. These activities must be supported by objective, systematic evaluation by students taught or mentored by the faculty member. Additionally, systematic evaluation by senior faculty within the department and by faculty within other divisions and/or departments in which the candidate has played an active teaching role are considered.

Service Activities and Academic Leadership

Can include:

- Membership on committees of affiliated institutions, such as IRB, IUCUC committee, QI committee, or search committees
- Membership on departmental, college, and/or university committees
- Participation in activities such as accreditation, assessment, or institutional effectiveness programs

Criteria for Promotion to Non-tenure Track Professor

The title of Professor represents the highest academic award within the institution and holds special recognition in the College and academic community. Not all Associate Professors will reach the rank of Professor. Promotion to Professor is not awarded on the basis of longevity, but rather on the basis of superior achievement at the national level with the promise of continued contribution. The usual minimum time in rank as Associate Professor is five years. There is no limit to the maximum years for consideration. Promotion is not based solely on performance at another university; one must demonstrate productivity at UCF. Early consideration for promotion to Professor is appropriate when all of the criteria that would have been evaluated after a five-year interval are all clearly fulfilled in fewer than five years. Years served in the equivalent rank at one or more institutions prior to beginning employment at UCF may be counted when calculating the number of years in rank. However, there is no maximum number; more than five years might be required to establish acceptable credentials. All candidates for promotion to Professor must demonstrate: a sustained record of productive scholarly activity and scholarship in their area(s) of concentration leading to national prominence. To receive appointment to non-tenure earning Professor in the Department of Clinical Sciences, a candidate must demonstrate: (1) continued excellence in his/her primary area of concentration, (2) a sustained, and productive record of scholarship in his/her area(s) of concentration, and (3) continued significant service contributions. Examples of the lines of evidence that may be used to demonstrate achievement of these criteria besides those listed above can be found in Appendix I.

Approved by COM Faculty, December 2011

Approved by UCF Faculty Affairs, April 2012

Approved by Provost, May 2012

Approved by COM Faculty, August-December 2012

Updated: March 4, 2014

CLINICAL TRACK NON-TENURE TRACK FACULTY

Approved by the College of Medicine Enterprise Committee February 19, 2015

Approved by Faculty Excellence April 15, 2015

General Considerations

Clinical track non-tenure track faculty are those who dedicate the majority of their effort to 1) direct patient care at UCF COM faculty practice sites such as UCF Health and affiliated hospitals, 2) clinical teaching and direct supervision of trainees (medical students and residents) at affiliated hospitals and practice sites, and 3) educational leadership and administrative roles (program, department, and division heads/chairs, CMOs). Clinical track non-tenure track faculty may participate in teaching and scholarly activities in any or all of these domains.

To qualify for promotion to a higher rank, clinical track non-tenure track faculty members are expected to demonstrate excellence in a primary area of focus (clinical practice and clinical leadership, teaching and educational leadership, scholarship and academic leadership), and competence in the other areas in which they have responsibilities. All faculty members participate in institutional service activities that augment the missions of the College (committees, task forces, etc). Service activities typically represent a relatively small proportion of any faculty member's assignment; yet significant contributions in this area should be recognized when considering qualifications for promotion.

The College of Medicine has identified examples of evidence (Appendix V) that may be used to demonstrate excellence in clinical service, teaching, scholarship, leadership, and other activities when a faculty member is considered for promotion to a higher rank. These lists of examples are intended to cover a wide range of activities and work products associated with a diverse faculty. Therefore, a faculty member is not expected to demonstrate every example of evidence listed. Consequently, evidence of excellence and achievement submitted as part of a promotion portfolio may vary significantly from one individual to another.

Criteria for Appointment to Clinical Track Non-Tenure at any Academic Rank

Appointment to Assistant Professor requires the physician to participate in clinical care for at least 50% of their effort.

Criteria for Promotion to Clinical Track Non-Tenure Track Associate Professor

The rank of Associate Professor recognizes accomplishments in:

- 1) clinical practice
- 2) education
- 3) scholarship in area of concentration
- 4) substantial service contributions

Promotion to Associate Professor requires demonstrated **excellence in one of the areas** indicated by numbers 1-3 above, and **competence in the other two areas**. In addition, a record of substantial service contributions is expected. Examples of lines of evidence that may be used to demonstrate achievement of these criteria are listed in Appendix V. The criteria are not based on the duration of an applicant's rank at the assistant level. National trends indicate that a period of at least 6 years is typical in order to fulfill the criteria; however, faculty may choose to be considered for promotion when they have met the requirements. It is prudent to initiate a promotion review only when a positive outcome can be reasonably assured.

Clinical Practice and Clinical Leadership

Excellence in clinical practice is an important element for promotion to Associate Professor in the clinical track non-tenure track. Examples of achievement in this area include but are not limited to founding faculty activities toward establishment of the College's clinical practice, documented practice of evidence-based medicine, excellent clinical outcomes, high patient satisfaction, establishment of a local or regional referral base, effective participation in clinical quality and safety initiatives, and local or regional recognition as a clinical authority in specialties of clinical practice.

Teaching and Educational Leadership

Excellence in teaching is an important component for promotion to Associate Professor in the clinical track non-tenure track. Examples of this achievement include but are not limited to course and module leadership, leading or participating in didactic sessions, mentorship of medical students, residents, graduate students and/or postdoctoral fellows, development of novel instructive materials, and teaching in diverse components of the MD and/or GME programs. These activities must be supported by objective, systematic evaluation by students and/or residents taught or mentored by the faculty member. Additionally, systematic evaluations by senior faculty within the department and by faculty within other divisions and/or departments in which the candidate has had an active teaching role are considered.

Scholarship and Academic Leadership

Acceptance of educational or other materials in peer-reviewed repositories, acceptance of articles for publication in refereed journals, poster presentations, invitations to speak at regional or national meetings, service as an *ad hoc* reviewer or on editorial boards, service on regional or national committees or review panels, and other similar lines of evidence are indicators that a candidate has established a strong regional or national reputation for scholarship.

Service Activities

Evidence of service to the college and/or university may encompass a broad range of activities including but not limited to the following:

- Membership on committees of affiliated institutions, such as IRBs, IUCUC committees, QI committees, or search committees
- Membership on department, program, college, and/or university committees

- Participation in activities such as accreditation, assessment, or institutional effectiveness programs

Criteria for Promotion to Clinical Track Non-Tenure Track Professor

The title of Professor represents the highest academic award within the institution and holds special recognition in the College and academic communities. Not all Associate Professors will reach the rank of Professor. Promotion to Professor is not awarded on the basis of longevity, but rather on the basis of superior achievement with the promise of continued contributions. The usual minimum time in rank as Associate Professor is five years, and there is no limit to the maximum years in rank prior to consideration for promotion. Promotion is not based solely on performance at another university; one must demonstrate productivity at UCF. Early consideration for promotion to Professor is appropriate when all of the criteria that would have been evaluated after a five-year interval are clearly fulfilled in fewer than five years. Years served in the equivalent rank at one or more institutions prior to beginning employment at UCF may be counted when calculating the number of years in rank. However, there is no maximum number limitation, and more than five years might be required to establish acceptable credentials.

All candidates for promotion to Professor must demonstrate a record of productive scholarly activity in their area(s) of concentration. To receive appointment to clinical track non-tenure track Professor, a candidate must demonstrate achievements beyond the requirements for Associate Professor as referenced in Appendix III.

Clinical Practice and Clinical Leadership

Continued excellence in his/her primary area of concentration

Teaching and Educational Leadership

A productive record of scholarship in his/her area(s) of concentration

Scholarship and Academic Leadership

A productive record of scholarship in his/her area(s) of concentration

Service Activities

Continued significant service contributions

APPENDIX I

UCF College of Medicine Examples of Evidence of Scholarship and Scholarly Activities

NOTE: The examples of scholarship, teaching, and service listed at each rank below are not exclusive to that rank. In particular, those examples of excellence in scholarly activity and teaching listed under Associate Professor, if sustained, would provide evidence for promotion to the rank of Professor. Founding faculty activities apply only to non-tenure track faculty.

Area	Associate Professor	Professor (In addition to examples for Associate Professor)
Scholarship in Research	<ul style="list-style-type: none"> • Founding faculty activities in development of the curriculum and practice program only applies to non-tenure track faculty • Experimental studies in basic research or clinical trials • Scientific grants • Publication of original research findings in peer-reviewed journals • Publication of materials in peer-reviewed depositories such as MedEdPORTAL • Publication of book chapters • Publication of teaching tools • Publication of guidelines and/or protocols for patient treatment or delivery of care • Presentations at national/international meetings (with refereed published abstracts) • Invited seminars/lectures at other institutions • Peer evaluation of materials presented at meetings or published in MedEdPORTAL • Peer review of curricular materials • Peer review of manuscripts for major journals • Adoption of innovative 	<ul style="list-style-type: none"> • Founding faculty activities in development of the curriculum practice/research programs only applies to non-tenure track faculty • Citations in peer-reviewed journals • Chairmanship of study sections/peer review groups • Publication of original findings in highest-impact journals within one's field • Publication of invited review articles • Procurement (as PI) of competitive grant funding for research, curriculum development, or other scholarly activities • Authoring entire textbook or other books • Invited presentations at national/international meetings • Editor of text, research, or other types of books • Editor or member of editorial board of journals • Member of grant review panels for major funding agencies (NIH, NSF, AHA, ACS, etc.) • Awards or other recognition for excellence in the scholarship of teaching and learning (SoTL) • Evidence of sustained

Appendix II

Founding Faculty Activities in establishing foundation of a new medical school

Planning and arranging for interim facilities to conduct laboratory experiences in anatomy, histology, pathology, physiology and microbiology for establishing foundation of a new medical school

Travel to other institutions to observe systems in place for educational programs

Establishing interim facilities for establishing foundation of a new medical school

Arranging for transportation back and forth to facilities on main campus from Research Park for students and faculty

Planning and arranging for interim Clinical Skill facilities with Department of Army in Research Park

Conceptualization, operation and actual design of laboratory facilities in Education Building at Lake Nona from working with architects to contractors

Planning, designing and initiating a human body donation program to receive human remains

Planning and implementing surgical courses for faculty in Florida, other states and other countries to learn new methods and technologies

Design of simulation and clinical skills center in Education Building at Lake Nona

Recruitment and training of standardized patients to participate in educational program

Development of individual preceptor training sites for each medical student to spend 4 hours every other week in the first and second years

Conducted personal visits to each preceptor site and provided faculty development and orientation to the educational goals of the college

Creating underlying policies and procedures for faculty and students for a new medical school in all aspects

Participation in orientation sessions conducted for volunteer/affiliated faculty who were going to participate in different modules (N=14) and clerkships (N=10)

Search committee responsibilities as faculty (N=25) were recruited for establishing foundation of a new medical school

Hiring of a full component of faculty to teach medical students

Participating in the preparation of support materials for the LCME site visits required for the stages leading to full accreditation of the college of medicine

Development of acceptable training sites for six core third-year clerkships and four, fourth-year clerkships

Development of over 100 electives in various disciplines in medicine at multiple hospital and practice locations throughout Central Florida to include Orlando, Titusville, and Melbourne

Recruitment of mentors for research projects for Focused Individualized Research Experience module

Fulfilling criteria for 135 LCME standards to achieve preliminary, provisional and full accreditation

Establishing clinical practice at practice site on University Boulevard

Participating in the design and space planning for the site

Selecting and implementing an electronic medical record

Participation in marketing activities for the new practice

Establishing a medical staff model

Developing policies and procedures for the practice

Developing quality and safety programs

Establishing patient satisfaction monitoring program

Establishing appropriate work flow at the practice site

Integrating evidence based medicine into the electronic medical record

Planning, designing, implementing and evaluating an integrated medical curriculum

Developing a process for fostering continuous quality improvement of the medical curriculum

Exploring and implementing new computer technologies for the educational experiences in the new and evolving medical curriculum

Training support staff involved in the implementation of the medical curriculum

Development of educational and research programs in UME and GME at VAMC-Orlando and Nemours Children's Hospital

Appendix III
Examples of Evidence for Clinical Track Non-Tenure Track

	Associate Professor	Professor (In addition to examples for Associate Professor)
Clinical Activity, Teaching, and Scholarship	<ul style="list-style-type: none"> • Attainment of local reputation for clinical excellence • Founding faculty activities or other significant role in development of the curriculum and practice program • Promotes use of innovative clinical treatments • Effective clinical outcomes • High patient satisfaction scores • Evidence of safety and quality improvement • Demonstrated practice of evidence-based medicine • Contribution to the development or enhancement of programs which enhance the success and reputation of one's department or other departments or programs within the College of Medicine • Participation in evaluation of patient outcomes data or participation in clinical trials. • Participation in LCME or ACGME accreditation activities • Demonstrated activity in professional societies • Invitations to speak at conferences • Evidence of publications which may include case 	<ul style="list-style-type: none"> • Attainment of regional reputation for clinical excellence • Founding faculty or other significant activities in development of the curriculum and practice program • Recognized for new patient programs and/or clinical innovation • Recognition for safety and quality improvement • Regional patient referrals and recognition as an expert in area of clinical practice • Development, enhancement, or management of a program that is integral to the success of one's own department or other departments or programs within the College of Medicine • Designs or participates in clinical trials or translational research • Evidence of research funding • Service as journal editor, book editor, or member of journal editorial board • Service on grant panels for major funding agencies • Participation in national boards and leadership groups within the candidate's field (i.e. board examiner, specialty boards, ACGME, NBME, site visits, inspector [CAP], etc.) • Invitations to present at national conferences or symposia • Evidence of peer-reviewed publications

	studies	<ul style="list-style-type: none"> • Reviews articles submitted to peer-reviewed journals • Participation in committees advisory to government or professional organizations
Service Activities and Academic Leadership	<ul style="list-style-type: none"> • Membership on departmental, college, and/or university committees • Membership on committees of affiliated institutions, such as IRB, IACUC, QI committee, or resident selection committee • Participation in activities such as accreditation, assessment, or institutional effectiveness programs • Provision of continuing education programs for community and/or university • Recognition from regional, state or national societies • Service to local community and community organizations • Development of programs that promote diversity • Reviewer of journal articles and/or grant proposals • Service as division chief, department chair, vice-chair, or equivalent • Service as assistant or associate dean • Service as director of laboratory or practice site (or other practice program-related leadership) • Demonstration of attainment of benchmarks (i.e., AAMC graduation questions.) 	<ul style="list-style-type: none"> • Membership on academic, medical, or research committees • Chairing of departmental, college, and/or university committees • Recognition from state or national societies • Development of mentoring programs for new faculty • Organization of teaching workshops, seminars, and/or professional meetings • Member of accreditation site teams (LCME, SACS, etc.) • Service as department chair, assistant dean, or associate dean • Service as director, or associate director in established units • Representation of COM in official activities
