Vision Statement

Educational Technology Services will become a national model for partnering with faculty to develop effective and efficient learning strategies that use innovative technologies towards improving learning outcomes.

Mission Statement

- Encourage and support faculty in the use advanced technologies for the design, development and delivery of instruction
- Stay abreast of innovative technologies with instructional applications
- Create, find, and modify electronic and print media for inclusion in instructional materials
- Provide guidance and feedback to faculty in the creation of pedagogically sound instructional materials
- Provide technological and instructional support for classroom delivery
