

**While you're thinking
Match Day 2020,**

**think about where you'd like
to be in 2040.**

**A place with 100s
of miles of world-
renowned beaches
where you can
master your
favorite hobbies?**

**With family?
In a small town?
Living near farms?
On a farm?**

**In a celebrated
city? One with
internationally-
acclaimed
art and culture?**

**Having a career in
a state with spectacular
medical systems,
and vibrant biomedical
research and training
opportunities.**

THINK FLORIDA

2020 MATCH THINK FLORIDA 2040 FUTURE

**Find a specialty and live in a state
that can excite you every day.**

When you think of a place to launch your medical career, think of Florida. Florida has many nationally recognized hospitals and medical systems, along with flagship training programs and incredible opportunities for training in biomedical research.

Florida is firmly committed to a clean and healthy environment, and providing our residents and visitors superb medical care.

**Every day, more than a thousand people
move to Florida, and that means we need you.**

3

Florida ranks third in population, after California and Texas.¹

23,357,003

Projected population in 2030.¹

24.1%

Percentage of the population that
will be 65 and older in 2023.¹
