# HCA Healthcare Library Update

The Library site has a new look and feel! The HCA Healthcare library contains over 7400 full-text e-journals and 2200 e-books, as well as a customized HCA PubMed portal, quick links to popular clinical resources like UpToDate, and advanced search and save features. A new partnership with the National Library of Medicine provides interlibrary loan for articles not available in the HCA Library.

This interactive site is browser-based, mobile compliant, and open to anyone with a 3-4 ID. The library site operates via single sign-on (SSO), so it s extremely simple to access. While on the HCA network, simply navigate to the link below. For off-network access, simply use the same link below and enter your 3-4 ID and network password.

Library Site Design Updates:

- Click the Clinical Resources button for quick links to UpToDate, NEJM, and HCA's customized PubMed.
- Search for articles by topic in the Discover Search, or by citation details using the Article Finder button.
- Browse library holdings via the Library Catalog and set journal alerts (formerly Library eResources Search).
- View the Knowledge Center's evidence summaries and content by clicking the Evidence Services button.
- The Support Page contains general library support and the link is located in the footer under Library Links.
